Novi Sad, Serbia

Education

- Bachelor of Electrical and Computer Engineering,
Faculty of Technical Sciences, University of Novi Sad Status – Graduated

Work Experience

Full-Stack & Software Developer - Freelance

April 2025 - Present

- Developed a modern website using HTML, CSS, and JavaScript to offer custom digital invitation services with RSVP functionality, helping attract and manage over 60 clients while simplifying the overall organization experience for users. [Website](#) | [Github](#)
- Designed and built a personal portfolio website using React and Tailwind CSS to showcase projects and technical skills, improving online visibility and providing clear proof of work for potential clients. [Website](#) | [Github](#)
- Collaborated directly with clients to deliver tailored web solutions aligned with their requirements, maintaining clear communication, a professional approach, and ensuring all projects were completed within strict deadlines.

Projects

PawMeet – Real-time Social Chat App for Dog Lovers | [Website](#) | [Github](#)

- Built a real-time social chat application for dog lovers using React.js and Tailwind CSS, enabling users to connect and chat through responsive interface, resulting in an interactive real-time communication experience.
- Architected a scalable backend using Node.js, Express.js, and MongoDB with a RESTful API architecture, implementing custom JWT authentication, API rate limiting, and real-time communication via Socket.io, resulting in a secure and stable system capable of handling concurrent user interactions.

E-commerce Shop with Admin Dashboard & Analytics | [Website](#) | [Github](#)

- Designed and developed an e-commerce application using React.js and Tailwind CSS, enabling users to browse products, manage shopping carts, apply coupon codes, and access an admin dashboard with analytics, resulting in a smooth, responsive, and intuitive online shopping experience.

- Implemented a secure backend using Node.js, Express.js, and MongoDB with a RESTful API architecture, integrating Stripe payment processing, Cloudinary for media handling, and authentication-protected routes, resulting in a scalable and production-ready system.

SaaS Landing Page | [Website](#) | [Github](#)

- Built a modern SaaS landing page using React.js, TypeScript, and Tailwind CSS, designing a responsive and visually appealing interface with smooth UI interactions and reusable components, resulting in a conversion-focused and user-friendly landing experience.

Work Experience

DNP Engineering, Novi Sad, Engineer

October 2025 - Present

- Took responsibility for key technical tasks within an engineering team on electrical projects, ensuring accurate execution and meeting strict deadlines, resulting in successful delivery of project milestones and efficient team coordination.
- Utilized engineering software tools for design, analysis, and documentation of electrical systems, ensuring accurate technical outputs and maintaining efficient project workflows with structured technical documentation.
- Worked with investors and project stakeholders, adjusting to their feedback and project requirements to ensure smooth and successful project delivery under strict timelines.

Technical Skills

React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Node.js, Express.js, MongoDB, RESTful APIs, Socket.io, JWT Authentication, Git, GitHub, Postman, Cloudinary, Stripe.
